Contents Volume 62 1999

Volume 62 No. 1 October 1999

Personal perspective

Forty years of microbial photosynthesis research: Where it came from and what it led to
R.C. Fuller **1–29**

Regular papers

Spirilloxanthin is released by detergent from *Rubrivivax gelatinosus* reaction center as an aggregate with unusual spectral properties
I. Agalidis, T. Mattioli, F. Reiss-Husson **31–42**

The primary quinone acceptor and the membrane-bound *c*-type cytochromes of the halophilic purple nonsulfur bacterium *Rhodospirillum salinarum*: A spectroscopic and thermodynamic study
G. Moschettini, P. Bonora, E. Zaccherini, A. Hochkoeppler, I. Principi, D. Zannoni **43–53**

Molecular mechanism of high-temperature-induced inhibition of acceptor side of Photosystem II
P. Pospíšil, E. Tyystjärvi **55–66**

Effects of anaerobiosis as probed by the polyphasic chlorophyll *a* fluorescence rise kinetic in pea (*Pisum sativum* L.)
P. Haldimann, R.J. Strasser **67–83**

Minimal requirements for *in vitro* reconstitution of the structural subunit of light-harvesting complexes of photosynthetic bacteria
J.B. Todd, P.A. Recchia, P.S. Parkes-Loach, J.D. Olsen, G.J.S. Fowler, P. McGlynn, C.N. Hunter, P.A. Loach **85–98**

Cloning and sequencing of the *pucBA* genes from two strains of *Rubrivivax gelatinosus*
A.E. Simmons, R.C. Mackenzie, R.J. Cogdell **99–106**

Technical communication

On the limits of applicability of spectrophotometric and spectrofluorimetric methods for the determination of chlorophyll *a/b* ratio
R. Kouřil, P. Ilík, J. Nauš, B. Schoefs **107–116**

Volume 62 Nos. 2–3 November–December 1999

Publisher's note **iii**

A decade of accomplishment and service
D. Ort **v**

Obituary: David Hall
K.K. Rao **117–119**

Minireview

The photosynthesis gene cluster of *Rhodobacter sphaeroides*
G.W. Naylor, H.A. Addlesee, L.C.D. Gibson, C.N. Hunter **121–139**

Regular papers

Measuring photosynthetic parameters in individual algal cells by Fast Repetition Rate fluorometry
M.Y. Gorbunov, Z.S. Kolber, P.G. Falkowski **141–153**

Photosynthetic enhancement and conductance to water vapor of field-grown *Solanum tuberosum* (L.) in response to CO_2 enrichment
R.C. Sicher, J.A. Bunce **155–163**

The effect of copper on chlorophyll organization during greening of barley leaves
V. Caspi, M. Droppa, G. Horváth, S. Malkin, J.B. Marder, V.I. Raskin **165–174**

Performance of active Photosystem II centers in photoinhibited pea leaves
G. Schansker, J.J.S. van Rensen **175–184**

Biosynthesis of non-fluorescent chlorophyll of Photosystem II core in greening plant leaves. Effect of etiolated plants growing under heat shock conditions (38 °C)
N.V. Ignatov, L. Ya. Satina, F.F. Litvin **185–195**

Resistance of photosynthesis to high temperature in two bean varieties (*Phaseolus vulgaris* L.)
C. Pastenes, P. Horton **197–203**

Mutation of the *Chlamydomonas reinhardtii* analogue of residue M210 of the *Rhodobacter sphaeroides* reaction center slows primary electron transfer in Photosystem II
C. Andronis, S.A.P. Merry, J.R. Durrant, D.R. Klug, J. Barber, P.J. Nixon **205–217**

Reliability of Photosystem II thermoluminescence measurements after sample freezing: Few artifacts with Photosystem II membranes but gross distortions with certain leaves
P.H. Homann **219–229**

Response of photosynthetic carbon assimilation in mesophyll protoplasts to restriction on mitochondrial oxidative metabolism: Metabolites related to the redox status and sucrose biosynthesis
K. Padmasree, A.S. Raghavendra **231–239**

Oxidizing side of the cyanobacterial Photosystem I: Mutational analysis of the luminal H loop of the PsaB subunit
J. Sun, M. Hervás, J.A. Navarro, M.A. De la Rosa, P.R. Chitnis **241–250**

The arrangement of chloroplasts in cells influences the reabsorption of chlorophyll fluorescence emission. The effect of desiccation on the chlorophyll fluorescence spectra of *Rhizomnium punctatum* leaves
H. Bartošková, J. Nauš, M. Výkruta **251–260**

General effect of photosynthetic electron transport inhibitors on translation precludes their use for investigating regulation of D1 biosynthesis in *Synechococcus* sp. strain PCC 7942
O. Schmitz, N.F. Tsinoremas, M.R. Schaefer, S. Anandan, S.S. Golden **261–271**

Dark reoxidation of the plastoquinone-pool is mediated by the low-potential form of cytochrome b-559 in spinach thylakoids
J. Kruk, K. Strzałka **273–279**

Changes in the structure and the functional state of thylakoids under the conditions of osmotic shock
V. Opanasenko, G. Semenova, A. Agafonov **281–290**

Contents Volume 62 **291–293**

Author index Volume 62 **295**

Instructions for authors **297–302**
